PROFESSIONAL SUMMARY

Agentic AI Developer & Generative AI Engineer with around **3 years** of experience building AI-powered applications, LLM-integrated systems, and enterprise backend platforms. Proficient in **LangChain, HuggingFace, RAG pipelines, CrewAI Multi-Agent systems, LangGraph, OpenAI API, Groq**, and **Generative AI** application development with **Streamlit** and **AWS SageMaker**. Experienced in Python, Flask, FastAPI, MongoDB, Vector Databases (AstraDB, FAISS, ChromaDB), SQL chatbots, LLM fine-tuning, and Time-Series Forecasting. Skilled in deploying intelligent AI agents and automation workflows across large-scale enterprise operations.

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL

AI & Generative AI: LangChain, HuggingFace, OpenAI API, Groq, Grok, Generative AI, RAG (Retrieval-Augmented Generation), LlamaIndex, Embeddings, Prompt Engineering, NLP, LLM Fine-Tuning

Agentic AI & Frameworks: CrewAI, LangGraph, Multi-Agent Systems, Agentic Workflows, NVIDIA NIM, Ollama, CodeLlama

Vector & Graph Databases: AstraDB, Pinecone, FAISS, ChromaDB, Neo4j (Graph DB), Hybrid Search RAG, Embeddings

ML & Deep Learning: Supervised Learning, Unsupervised Learning, Time-Series Forecasting, Feature Engineering, TensorFlow, Scikit-learn

Backend & APIs: Flask, FastAPI, Node.js, REST APIs

Frontend & Deployment: Streamlit, React.js, HTML, CSS, HuggingFace Spaces

Cloud & Big Data: AWS SageMaker, AWS (Basic), PySpark (Basic), Docker

Databases: MongoDB, SQL, Vector Databases

Tools & DevOps: Git, CI/CD, GitHub Actions, Docker, MLflow, Linux/Unix Terminal, Claude AI (Cowork)

PROFESSIONAL EXPERIENCE

Software Engineer

Aug 2025 – Present

Enmovil IT Solutions | Hyderabad, India

- Developed scalable backend systems for logistics analytics, GPS telemetry processing, forecasting workflows, and enterprise logistics automation platforms
- Engineered Flask, FastAPI, Node.js, and MongoDB-based APIs for shipment tracking, route analytics, workflow automation, and operational monitoring applications
- Built high-performance telemetry processing pipelines, optimized backend workflows using asynchronous processing and MongoDB query optimization, and supported CI/CD deployments via GitHub Actions and Docker

Junior Software Engineer

Jan 2024 – Jul 2025

Enmovil IT Solutions | Hyderabad, India

- Contributed to backend development and logistics workflow automation systems using Python, Flask, MongoDB, and REST APIs
- Worked on shipment tracking systems, GPS monitoring workflows, API integrations, telemetry processing, operational dashboards, and transportation analytics systems
- Assisted in designing and testing RESTful APIs, collaborated with cross-functional teams, and supported production deployments ensuring system stability and performance

MERN Stack Developer Intern

Sep 2023 – Nov 2023

B2World Technologies | Remote (Work From Home)

- Developed and integrated full-stack web application features using MongoDB, Express.js, React.js, and Node.js during a 3-month internship program
- Built responsive UI components in React.js, implemented REST API endpoints, and worked on database schema design using MongoDB
- Collaborated with the development team on real-world project delivery, gaining hands-on experience in agile workflows and production-ready code practices

CERTIFICATIONS & LEARNING

- Udemy – **Complete Generative AI with LangChain & HuggingFace** (Krish Naik) – RAG, CrewAI, LangGraph, AstraDB, Streamlit, AWS SageMaker, SQL Chatbots, LLM Fine-Tuning ✓ Completed
- Industry Ready Certification in Full-stack Development – NxtWave ✓ Completed
- MERN Stack Development Certification – B2World Technologies ✓ Completed

KEY PROJECTS

Agentic AI Chatbot & RAG Platform

Python, LangChain, HuggingFace, OpenAI API, Groq, CrewAI, LangGraph, AstraDB, FAISS, ChromaDB, Streamlit, FastAPI

- Built a multi-agent AI chatbot using LangChain, CrewAI, and LangGraph with autonomous multi-step reasoning, tool calling, and memory management for domain-specific question answering
- Implemented RAG pipelines with AstraDB, FAISS, and ChromaDB vector databases for PDF query, Hybrid Search RAG, and real-time document retrieval using HuggingFace embeddings and OpenAI/Groq LLMs
- Developed SQL Conversational Chatbot for natural language database querying, and deployed AI applications via Streamlit and HuggingFace Spaces with FastAPI backend and persistent conversation history

Vedanta – Forecasting & Decision Intelligence Platform

Python, FastAPI, Time-Series Forecasting, Machine Learning, Scikit-learn

- Developed an enterprise Forecasting & Decision Intelligence Platform supporting statistical forecasting and automated demand prediction workflows
- Implemented forecasting models using Exponential Smoothing, Holt-Winters, Feature Engineering, anomaly handling, and automated model-selection pipelines across large-scale time-series datasets
- Improved forecast accuracy by ~5% through preprocessing, trend analysis, and seasonality detection pipelines, enabling real-time demand prediction at scale

Maruti Suzuki – Route Analytics & Deviation Detection System

Python, Flask, MongoDB, GPS Telemetry, Geospatial Analytics, KDTree Spatial Analysis

- Reduced fuel costs by ~15% by developing a real-time Route Analytics Platform processing 2M+ GPS telemetry records for route optimization and transport compliance
- Reduced telemetry processing time by ~60% by optimizing quarterly route processing into incremental date-range-driven analytics workflows
- Engineered scalable Base Route Generation and Route Deviation Detection using KDTree spatial analysis, trajectory aggregation, and Haversine distance calculations across 10K+ GPS-tracked trips

Daimler Benz – Enterprise Ticket Management System (TMS)

Python, Node.js, Flask, React.js, MongoDB, Azure Blob Storage, REST APIs

- Developed an enterprise TMS for invoice validation, hold management, odometer verification, vehicle breakdown tracking, and PDF upload workflows using Azure Blob Storage
- Engineered scalable Flask, Node.js, and MongoDB backend workflows with React.js operational dashboards for ticket lifecycle management and real-time issue tracking
- Reduced manual support coordination by ~40% through automated reporting, workflow tracking, and centralized ticket management

EDUCATION

Sphoorthy Engineering College, Rangareddy, Hyderabad

2018 – 2021

Bachelor of Technology (B.Tech) – Mechanical Engineering

CGPA: 6.86

Completed

NxtWave Disruptive Technologies

2022 – 2023

Industry Ready Certification in Full-stack Development

Completed
