PROFESSIONAL SUMMARY

Python & AI/ML Engineer | Generative AI Developer with around **3 years** of experience building backend systems, real-time data pipelines, logistics analytics platforms, and machine learning solutions using Python, **Flask**, **FastAPI**, React.js, and MongoDB. Skilled in time-series forecasting, geospatial analytics, real-time data processing, and API-driven enterprise automation across large-scale logistics operations. Currently expanding into Generative AI using **LangChain**, **HuggingFace**, **RAG pipelines**, **CrewAI Multi-Agent systems**, LangGraph, OpenAI API, Groq, Vector Databases, and Model Deployment — built and deployed.

TECHNICAL SKILLS

Languages: Python, JavaScript, NoSQL

AI & Generative AI: LangChain, HuggingFace, OpenAI API, Groq, Generative AI, RAG (Retrieval-Augmented Generation), LlamaIndex, Embeddings, Semantic Search, Prompt Engineering, NLP, LLM Chains, Memory Management, Document Loaders, Text Splitters, Output Parsers, Conversational AI, LLM Fine-Tuning, Model Deployment, LangSmith

Machine Learning: Supervised Learning, Unsupervised Learning, Reinforcement Learning, Time-Series Forecasting, Feature Engineering, Real-time Data Processing, Data Pipelines

Backend & APIs: Flask, FastAPI, Node.js, REST APIs, Express.js, API Testing, Third-Party API Integrations

Frontend: React.js, HTML, CSS, Streamlit

Databases: MongoDB, SQL (Basic), AstraDB, FAISS, ChromaDB

Libraries: Pandas, NumPy, Scikit-learn

Cloud & Storage: Azure Blob Storage, AWS S3

Tools: Git, Docker, Postman, Linux/Unix Terminal, Claude AI (Cowork), GitHub Copilot, VS Code, Agile / Scrum

PROFESSIONAL EXPERIENCE

Software Engineer

Aug 2025 – Present

Enmovil IT Solutions | Hyderabad, India

- Architected and deployed scalable backend systems for logistics analytics and GPS telemetry processing, reducing data pipeline execution time by ~35% through optimized MongoDB queries and asynchronous processing
- Built 10+ REST APIs using Flask, FastAPI, and Node.js for shipment tracking, route analytics, and workflow automation, supporting 5+ enterprise logistics clients
- Containerized backend services using Docker, streamlining deployment workflows and ensuring consistent production environments across multiple logistics platforms

Junior Software Engineer

Jan 2024 – Jul 2025

Enmovil IT Solutions | Hyderabad, India

- Worked on real-time GPS telemetry processing, shipment tracking systems, and transportation analytics handling live data across 1,000+ tracked vehicles
- Contributed to machine learning and time-series forecasting modules using Python, Flask, and MongoDB, supporting demand prediction and operational analytics workflows
- Applied reinforcement learning concepts in backend automation workflows and assisted in designing RESTful APIs, supporting production deployments with 99%+ system uptime

MERN Stack Developer Intern

Sep 2023 – Nov 2023

B2World Technologies | Remote (Work From Home)

- Built and delivered full-stack web application modules using MongoDB, Express.js, React.js, and Node.js within a 3-month internship, completing tasks ahead of sprint deadlines
- Crafted 8+ responsive UI components in React.js and integrated REST API endpoints with MongoDB database schema design, reducing page load time by ~20%
- Participated in agile sprints, daily standups, and code reviews — contributed production-ready code merged into the main branch within the first 4 weeks

CERTIFICATIONS & LEARNING

- Udemy – Complete Generative AI with LangChain & HuggingFace (Krish Naik) – RAG, LangChain, HuggingFace, Vector DBs, Streamlit [In Progress]
- Industry Ready Certification in Full-stack Development – NxtWave [Completed]
- MERN Stack Development Certification – B2World Technologies [Completed]

KEY PROJECTS

AI Chatbot & RAG Application

Python, LangChain, HuggingFace, OpenAI API, AstraDB, FAISS, ChromaDB, Streamlit, FastAPI, MongoDB

- Built an AI Chatbot using LangChain, HuggingFace, and OpenAI API with context-aware question answering, conversation memory, and domain-specific document understanding
- Deployed RAG pipelines with AstraDB, FAISS, and ChromaDB for PDF-based document retrieval, enabling semantic search and real-time question answering using HuggingFace embeddings
- Built a Conversational Chatbot interface using Streamlit with FastAPI backend, supporting persistent conversation history, multiple LLM providers, and real-time response streaming

Vedanta – Forecasting & Decision Intelligence Platform

Python, FastAPI, Time-Series Forecasting, Machine Learning, Scikit-learn

- Developed an enterprise Forecasting & Decision Intelligence Platform supporting statistical forecasting and intelligent demand prediction workflows
- Applied forecasting models using Exponential Smoothing, Holt-Winters, Feature Engineering, anomaly handling, and self-selecting model pipelines across large-scale time-series datasets
- Improved forecast accuracy by ~5% through preprocessing, trend analysis, and seasonality detection pipelines, enabling real-time demand prediction at scale

Maruti Suzuki – Route Analytics & Deviation Detection System

Python, Flask, MongoDB, GPS Telemetry, Geospatial Analytics, KDTree Spatial Analysis

- Lowered fuel costs by ~15% by developing a real-time Route Analytics Platform processing 2M+ GPS telemetry records for route optimization and transport compliance
- Cut telemetry processing time by ~60% by optimizing quarterly route processing into incremental date-range-driven analytics workflows
- Engineered scalable Base Route Generation and Route Deviation Detection using KDTree spatial analysis, trajectory aggregation, and Haversine distance calculations across 10K+ GPS-tracked trips

EDUCATION

Sphoorthy Engineering College, Rangareddy, Hyderabad

2018 – 2021

Bachelor of Technology (B.Tech) – Mechanical Engineering

Completed

NxtWave Disruptive Technologies

2022 – 2023

Industry Ready Certification in Full-stack Development

Completed
